

GZ-xx

Introduction

The GZ-xx family includes accessories and test gas components for carbon monoxide (CO), carbon dioxide (CO₂), and related gas analysis applications. The range covers 12-liter test gas cylinders with different gas concentrations. It also includes calibration sets and gas connection sets for ECO 420 / G 1910, as well as combination adapters, flow adapters, test gas caps, and MiniFlo regulating valves for controlled and reliable gas handling. The family is designed to support calibration, connection, and measurement tasks in portable gas analysis applications.

Available product variants

Ordercode	Description	Article No.
GZ-18	GZ-18 - Gas cylinder containing 12 liters of test gas: 5,000 ppm CO ₂ .	476698
GZ-19	GZ-19 - Calibration set for ECO 420 / G 1910 containing valve for 12 l gas cylinder, quick-connect adapter 6 mm, closing screw, and gas-bezel.	476699
GZ-12	GZ-12 - 12-liter gas cylinder containing test gas: N ₂ for CO and CO ₂ calibration at 0 ppm.	479183
GZ-20	GZ-20 - Gas connection for ECO 420 / G 1910 containing quick-connect adapter 6 mm, spare closing screw, and gas bezel.	479767
GZ-5826	GZ-5826 - Combination adapter for compressed air (G5/8) and Nitrox DIN M26, plastic.	482473
GZ-10	GZ-10 - Test gas cap GCO (for controlled gas flow GCO 100).	603133
GZ-11	GZ-11 - Flow Adapter, M16x1 Internal Thread with 6/4 mm Hose Connection.	603144
GZ-04	GZ-04 - MiniFlo regulating valve for 12 l gas cylinders, 0.5 - 1.5 l/min.	603570
GZ-02	GZ-02 - Gas cylinder containing 12 liters of test gas: 30 ppm CO.	606710
GZ-03	GZ-03 - Gas cylinder containing 12 liters of test gas: 300 ppm CO.	606711
