

Plastic Check Valve for Mounting onto ZOT 369 T-Piece

GRV 100

Introduction

Gas analysis setups often depend on small components that keep the sampling path arranged correctly. This plastic check valve is designed for mounting onto the ZOT 369 T-piece, giving users a dedicated valve component for this connection point.

Its role is clear: the valve supports controlled flow direction in a gas analysis arrangement while fitting directly to the specified T-piece. The plastic construction keeps the component suitable for accessory use where a lightweight valve is required.

Defined gas path

Check valve design supports controlled flow direction in gas analysis setups.

Direct T-piece fit

Made for mounting onto the ZOT 369 T-piece.

Plastic construction

Plastic valve body supports lightweight accessory use.

GRV100-GE	GRV 100 - Plastic check valve for gas analysis, made for mounting onto the ZOT 369 T-piece. It supports defined flow direction in the gas path with a compact accessory format.	603093

Features

Check valve function

The component acts as a check valve within a gas analysis setup and supports one-way flow behavior in the sampling path.

ZOT 369 mounting

The valve is designed for mounting onto the ZOT 369 T-piece.

Plastic valve body

The valve is a plastic component for use as a gas analysis accessory.
