GOEL 370 / GOEL 381

Oxygen-sensor element

- electrochemical replacement element
e.g. for ECO 410, G 1690, GMH 369x/GMH 569X, RESOX 5695
- long service life
- maintenance-free

DESCRIPTION

GOEL 370 (acidic electrolyte): Features a long service life (>3 years in air).

Designed for oxygen measurements in diving gas ("Nitrox"), recommended for a measuring range of 0.2 to 35 vol.-% O₂.

In addition, the GOEL 370 is suitable for inert gas measurements which have a high CO₂ content, or which are almost exclusively CO₂ gas. The acidic electrolyte ensures that the sensor is insensitive to the CO₂ gas and retains its stability.

GOEL 381 (alkaline electrolyte): Sensor for low oxygen concentrations close to 0.0 up to 100 vol.-% O₂.

Best choice for immersion gas measurements > 35 vol.-% O₂.

ORDERING ARTICLES

GOEL370-GE	Art.-Nr. 601490
GOEL381-GE	Art.-Nr. 610035

SCOPE OF DELIVERY

- Sensor element
- Flow-Diverter ESA 369

ESA369

Oxygen-sensor element

INSTRUCTIONS FOR USE

Best mounting/measuring position: sensor opening downwards.

After opening the packaging, a waiting time of 2 hours must be observed.

Due to different temperatures at the sensor opening and the rear housing area around the connector socket, a measurement error may occur; ensure sufficient adjustment time (e.g. 5 min, do not heat up, e.g. by holding in the hand).

Excessive flow at the sensor opening can lead to dynamic pressure, resulting in overly high values being measured in the absence of compensation.

SAFETY INSTRUCTIONS

1.  **DANGER** The product must not be used for diagnostic or other medical purposes on patients.
2.  **DANGER** The product is not suitable for use in potentially explosive atmospheres!
3.  **DANGER** Do not use in safety / emergency stop devices!
Not suitable for application with functional safety requirements, e.g. SIL!
4.  **DANGER** The product is not suitable for underwater use (rebreather)!
5.  **DANGER** The sensor contains KOH (GOEL 381) or acid (GOEL 370).
KOH and acids cause chemical burns!
In case of leaking liquid, avoid contact at all costs!
In case of contact:
 - with skin: wash off immediately with plenty of water for several minutes.
 - with clothing: remove contaminated, soaked clothing immediately.
 - with eyes: rinse under running water for several minutes, consult a doctor.If swallowed:
 - drink plenty of water immediately, do not induce vomiting!
 - Consult a doctor.

 Storage recommended max. 6 months. Avoid exceeding the storage period!
