

Test adapter for GMH 38xx & GMR 110

GPAD 38

Introduction

Routine checks are easier when the meter can be compared against defined reference points. This test adapter provides two reference values for checking the device functions of GMH 38xx and GMR 110 resistive material moisture meters.

The banana socket connection gives a clear interface for connecting the adapter during verification work. It is a practical accessory for users who need a direct way to check the function of compatible material moisture meters.

Function checks

Check GMH 38xx and GMR 110 device functions with an adapter made for these meters.

Two reference values

Verify instrument response against two defined reference values.

Clear connection

Banana sockets provide the connection interface for the test adapter.

Ordercode	Description	Article No.
GPAD38-GE	Test adapter for checking GMH 38xx and GMR 110 resistive material moisture meters, with two reference values and banana socket connection for function checks.	601328

Features

Reference value check

The adapter provides two reference values for checking compatible resistive material moisture meters.

Compatible meters

The adapter is intended for GMH 38xx and GMR 110 devices.

Banana socket interface

The connection is made via banana sockets.
