

Adapter for Attaching Electrodes

GAD 1

Electrode adapters for full BNC ↔ cinch compatibility one connects a BNC electrode to a meter with a cinch input, the other connects a cinch electrode to a meter with a BNC input. uick plug-on conversion for lab and field use.

Introduction

The GAD 1 product family provides a simple and reliable way to connect electrodes with different connector types. These electrode adapters ensure full compatibility between BNC and cinch connections, making it easy to use existing electrodes with a wider range of measuring instruments. **GAD 1 BNC** allows a BNC electrode to be connected to a meter with a cinch input, while **GAD 1 CINCH** enables a cinch electrode to be used with a meter featuring a BNC input. Designed for quick plug-on conversion, GAD 1 helps avoid connection issues, reduces the need for additional equipment, and supports flexible use in both laboratory and field measurement applications.

Available product variants

Ordercode	Description	Article No.
GAD1-BNC-GE	GAD 1 BNC - Adapter for connecting electrodes with BNC plugs to devices with RCA jacks.	601382
GAD1-CINCH-GE	GAD 1 CINCH - Adapter for connecting electrodes with RCA plugs to devices with BNC sockets.	601384

Order Hints

The connection type in the order code refers to the connection type of the electrode.
