

GENERAL CHARACTERISTICS

The principle of operation is of potentiometric type, based on the gradual shutdown of a chain of resistors and reed contacts, placed inside the guiding rod, by a magnetic float. The only moving element is the float that moves, for buoyancy, along the measuring rod. This ensures a high degree of reliability.

Set point and output signal are adjustable on the device or more easily remotely via the My-Valco smartphone App

- **Brass – Spansil**
- Measuring resolution 5 – 10 – 20 mm.
- Local indicator 4 digit (9999)
- Display and electrical connection are independently rotatable 335°/343°
- Analogue output switchable mA or V
- Parametrization via NFC communication system through APP
- Integrated data logger function
- Up to 6m length
- Maximum working pressure 20 Bar
- Operating ambient temperature -30/+55°C UR 90%.
- Standard working temperature up to 105°C. Executions up to 120°C on request.
- Minimum degree of protection IP65.

..... don't forget to download MyValco App
.....the fastest way to setup your device
