Application example
in the food industry

Application example
in building technology

The G 1000 series combines function with user-friendliness

Your advantages:

- precise, fast and reliable
- first-class price-performance ratio
- ergonomic design and easy operation
- rotating, illuminated and break-proof display
- watertight and dust-tight in accordance with IP 65/67
- long battery life (up to 5,000 hours)
- "Offset and scale function" enables readjustment (freely selectable zero point)
- "Hold function" for freezing measured values
- "Min / Max function" for minimum and maximum recorded measured value
- temperature measuring device with alarm function
- Made in Germany

G 1500 pH-meter and G 1700 compact thermometer

Pure & tireless measurement

Before developing the new G 1000 product series we entered into an intensive exchange with customers from a wide variety of industries in order to take their requirements into account.

We have implemented the following for you:

- compact and robust device
- quick measurement readings, virtually no delay, no long waiting times
- auto-power-off and low energy consumption increase battery life
- operation with 2 AA batteries (easy replacement with standard batteries)

Accessories: You can select the right accessories for your application from various sensors and electrodes. Contact us if you have a special requirement. We would be pleased to prepare a customised solution for you. Detailed information concerning accessories is provided at www.g1000-serie.de.

Application example
in laboratory analysis

Ideal for numerous applications:

- Laboratory analysis
- Quality assurance
- The trades and service
- Food production
- Research and development and much more

Application example
in the fisheries sector

Individual design

**We modify the housing design
to meet your requirements**

Custom printing of the housing
in your corporate colour,
with your device name
and your logo.
