Declaration on EU Regulation (EU) 1907/2006; PFAS

Dear customers,

We are currently receiving more and more inquiries regarding the use of per- and polyfluoroalkyl compounds (PFAS) in relation to EU Regulation (EU) 1907/2006.

The risks arising from the manufacture, marketing or use of PFAS are currently not adequately controlled.

In the Chemicals Strategy for Sustainability, the European Commission has therefore announced a comprehensive package of measures to address the use of PFAS and the resulting contamination. The restriction of the entire group of PFAS in the EU chemicals regulation REACH (Regulation (EC) No. 1907/2006) is part of this package of measures. A final decision on restricting the use of PFAS is not expected until 2025 at the earliest.

With this letter, we would like to inform you as a customer of Senseca Germany GmbH that we only use parts and components from well-known manufacturers and long-standing, trusted distributors in our products. However, as a manufacturer of end devices, we have no influence on the origin of raw materials used by our suppliers. Therefore, we cannot assume any liability in this regard. We are committed to the traceability and transparency of our suppliers' products and many manufacturers and distributors provide information on their websites. Please understand that we are unable to fill out special questionnaires due to the very sharp increase in the number of requests. However, we hope that this letter contains the information you have requested and thank you for your trust and good cooperation.

Remscheid, Jan 1st, 2024
