

Declaration on Regulation (EC) Number 1907 / 2006 (REACH)

Dear customers,

As a manufacturer of measurement and control products, we have the position of downstream user - producer of articles - in accordance with the REACH Regulation.

Senseca Germany GmbH does not supply substances or preparations which fall under the information, authorisation or registration obligation according to (EC) Regulation 1907 / 2006, nor does it occur in accordance with the use of our products for an intended release of substances. Therefore, registration according to Article 7 (1) in the sense of the above-mentioned regulation is not required.

As a downstream user, we nevertheless feel obliged to inform you as our valued customer in accordance with Article 33 of the REACH Regulation in case that more than 0.1 % by mass of substances of very high concern are present in our products, such as in the SVHC Candidate List (ECHA) are listed.

According to our suppliers, the materials we use do not contain any substances from the SVHC Candidate List (ECHA) or comply with the maximum permissible limit values. It is agreed with our suppliers that only REACH-conform products will be delivered to us. If the conformity is not complied with, our suppliers are obliged to inform us immediately. From today's point of view and against the background of the information provided by our suppliers, it is not to be expected that SVHC substances i. d. S. of the (EC) Regulation 1907 / 2006 are contained in a mass concentration above 0.1% in the delivered products.

Please understand that we cannot fill out special questionnaires due to the very strong increase in the number of inquiries.

However, we hope that this letter contains the information requested by me and thank you for your trust and good cooperation.

Remscheid, Jan 1st, 2024
