

## Declaration on Directive 2011/65/EU and 2015/863/EU (RoHS)

Dear customers,

Directives 2011/65/EU and 2015/863/EU of the European Parliament and of the Council on the restriction of the use of hazardous substances in electrical and electronic components regulate requirements for harmful substances in electrical and electronic equipment.

Accordingly, no more articles may be imported into the European Community or traded in the EC that do not meet these requirements. On the basis of the information available to us from our upstream suppliers, we confirm compliance with the directives according to 2011/65/EU and 2015/863/EU. For sales products covered by the RoHS Directive, RoHS conformity is confirmed by the EU Declaration of Conformity.

The following elements are not included, or are contained only in very small quantities (0.1% - 0.01% for cadmium – % by weight of homogeneous materials) in accordance with Annex II of the Directive:

- Cadmium
- Mercury
- Hexavalent chromium (Cr6+)
- Polybromierte Biphenyle (PBB)
- Polybromierte Diphenylether (PBDE)
- Diphthalat (DEHP)
- Butylbenzylphthalat (BBP)
- Dibutylphthalat (DBP)
- Diisobutylphthalate (DIBP)

Annex III of the RoHS Directive defines uses exempt from the restriction of Article 4, paragraph 1, including the use of lead as an alloying element with the following maximum concentration values:

6a: 0.35 percent by weight for lead as an alloying element in steel

6b: 0.40 percent by weight for lead as an alloying element in aluminum

6c: 4.00 percent by weight for lead as an alloying element in copper

Annex IV of the RoHS Directive defines uses exempt from the restriction in Article 4(1) in relation to medical devices, as well as monitoring and control instruments.

Exceptions to this are considered exceptions.

1a: Lead and cadmium in ion-selective electrodes, including gas from pH electrodes

1b: Lead anodes in electrochemical oxygen sensors.

The RoHS compliance of our products includes the application of applicable exemptions from Annex III as well as Annex IV of EU Directive 2011/65/EU. For our products, exceptions 6a, 6b and 6c as well as 1a and 1b are predominantly applied.

Irrespective of the validity of the RoHS Directive for our products, we declare, to our knowledge and against the background of the information provided by our suppliers, that the products placed on the market by Senseca Germany GmbH do not contain any substances in concentrations and applications that are prohibited in accordance with the applicable requirements of EU Directive 2011/65/EU and its amendments, including Delegated Directive (EU) 2015/863.

With regard to compliance with the requirements arising from Directives 2012/19/EU (WEEE) and 2011/65/EU, we can confirm that our products are classified as Category 9 (monitoring and control instruments as defined in Annex IA of the WEEE Directive).

Please understand that we are unable to fill out special questionnaires due to the sharp increase in the number of enquiries. However, we hope that this letter contains the information you want and thank you for your trust and good cooperation.

Remscheid, 01. April 2025
